Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Lemire, as set forth the previous office action (first action non-final).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lemire in view of Phelps, as set forth in the previous office action.

Claims 18-25, 27-29 and 37-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lemire in view of Phelps, along with Pepper, as set forth in the previous office action.

Allowable Subject Matter

Claims 9, 12-17, 26, 30-36 and 39-45 are allowed.

Response to Arguments

Applicant's arguments filed January 18, 2005 have been fully considered but they are not persuasive. Applicant argues that the back portion of Lemire is not configured to rest on a surface; it is configured to be suspended in air. However, the back portion of Lemire is capable of resting on a surface. It does matter whether or not it is resting on the surface because the surface is not claimed. Applicant argues that the strap 16 is not a hanging tab. However, the strap 16 can be interpreted as a tab that can be attached to any object and hang from that object. Applicant argues that Phelps does not cure the deficiencies of Lemire. However, Phelps was used as a modifier to make the foam disclosed by Lemire out of resilient type foam. Applicant argues that it is not old and well known to form a vinyl that is latex-free and has an antimicrobial agent therein. However, there are condoms, gloves and drapes that are made of vinyl and latex free with antimicrobial agents therein. The words antimicrobial agents are so broad that so many different types of medicaments can be used as the agent. The applicant has asked that references being provided to support certain rejections. However, the examiner maintains the position that the prior art teachings for the structural limitations are old and well known in the prior art. Applicant argues that Pepper does not cure the deficiencies of Lemire and Phelps. However, Pepper was used as modifier to provide a storage rack to store the device before it is used.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
